

GEETHA K

DevOps Engineer | AWS Cloud & Kubernetes

geethadevops13@gmail.com | +91 9032623058 | Hyderabad, India

PROFESSIONAL SUMMARY

- 3.5 years of experience as a **DevOps Engineer** designing, implementing, and managing scalable, secure, and resilient cloud infrastructure on **AWS** using **Terraform** for infrastructure as code.
- Hands-on experience orchestrating and managing containerized workloads with **Kubernetes (K8s)** and **Docker**, including deployments, services, and config maps, to ensure optimal performance and availability.
- Skilled in building and maintaining robust **CI/CD pipelines using Jenkins**, integrating Git, Maven, Docker, and Kubernetes to automate build, test, and release workflows.
- Working knowledge of performance monitoring and observability tools including **Prometheus and Grafana** to enhance system reliability and visibility.
- Strong record of collaboration with clients, engineering teams, and infrastructure specialists to deliver high-quality, reliable solutions.
- Proactive in adopting new tools and best practices — configuration management with **Ansible** and infrastructure automation with **Terraform** — to drive team and project success.
- Takes full ownership of project execution, ensuring timely delivery, deployment consistency, and adherence to budgets and timelines.
- Experienced with AWS services: EC2, AMI, VPC, IAM, EBS, ELB, Auto Scaling, Route53, S3, RDS, AWS Lambda and EKS (Elastic Kubernetes Service).
- Solid Linux (Ubuntu) administration background with shell scripting and Apache Tomcat application server management.

TECHNICAL SKILLS

Cloud Platform	AWS (EC2, VPC, IAM, EBS, ELB, Auto Scaling, Route53, S3, EKS, RDS, AWS Lambda)
Infrastructure as Code	Terraform, Ansible
Containerization & Orchestration	Kubernetes (K8s), Docker
CI/CD	Jenkins
Monitoring & Observability	Prometheus, Grafana
Version Control	Git
Build Tools	Maven
Application Servers	Apache Tomcat
Operating Systems	Linux (Ubuntu), Windows

PROFESSIONAL EXPERIENCE

- Sr. Software Consultant** — TCS, Hyderabad (July 2024 – Present)
- Software Consultant** — United Airlines (March 2023 – July 2024)

Master of Science — Acharya Nagarjuna University, Guntur

PROJECT 1: Jenkins High Availability Setup on AWS

- Environment:** Git, Maven, Jenkins, Docker, Kubernetes, Ansible, Terraform, AWS
- Role:** Software Consultant

Designed and implemented a highly available Jenkins CI/CD environment on AWS to automate the build, testing, containerization, and deployment of applications, using Terraform-driven infrastructure provisioning and Kubernetes-based container orchestration for scalability and resilience.

Key Contributions:

- Designed and configured a highly available, secure, and resilient CI/CD infrastructure on AWS, provisioning resources using Terraform.

- Orchestrated and managed containerized workloads on Kubernetes, deploying applications and managing services and configurations for optimal performance and availability.
- Built and maintained CI/CD pipelines in Jenkins to automate source code checkout, Maven builds, testing, Docker image creation, and deployment.
- Integrated Docker with Jenkins pipelines to automate image creation and publishing to container registries, then deployed to Kubernetes clusters.
- Used Ansible playbooks alongside Terraform to automate Jenkins installation, server configuration, and application deployment, reducing manual intervention.
- Monitored system and pipeline performance using Prometheus and Grafana, tracking build failures, deployment issues, and application availability, and driving root-cause analysis.
- Collaborated closely with development teams to troubleshoot build, deployment, container, and environment issues, taking ownership of fixes end to end.
- Managed Git branches, merges, and repository integration as part of the release process, following CI/CD best practices to improve deployment speed and reliability.

PROJECT 2: J.C. Penney Online Retail Store

- **Environment:** Git, Maven, Jenkins, Docker, Kubernetes, Ansible, Terraform, AWS
- **Role:** Sr. Software Consultant

An e-commerce platform supporting product browsing, search, shopping cart, order processing, and customer transactions. Owned the CI/CD platform automating builds, testing, containerization, and deployment across environments on AWS, with Kubernetes for scalable container orchestration.

Key Contributions:

- Designed and maintained Jenkins CI/CD pipelines automating application build, test, and deployment across dev, QA, and production environments on AWS.
- Deployed and managed containerized applications on Kubernetes clusters, creating and maintaining Deployment, Service, and ConfigMap resources to ensure availability and performance.
- Built Docker images from custom Dockerfiles for packaging applications into portable, production-ready containers.
- Automated server configuration and application setup using Ansible playbooks, improving deployment consistency and reducing manual effort.
- Worked with AWS services (EC2, EKS, ELB, S3, Route53) to support scalable, secure application hosting and infrastructure requirements.
- Monitored Jenkins pipelines and Kubernetes workloads, troubleshooting pods, services, and deployments; supported production releases with deployment validation and rollback.
- Collaborated with developers, QA, and infrastructure teams to resolve application and deployment issues, and took ownership of release planning and incident resolution.
- Managed Git branches, pull requests, and code integration, continuously improving the CI/CD process and advocating for automation best practices.

PERSONAL DETAILS

Date of Birth: 13-01-1989

Marital Status: Married

Languages Known: Telugu, English, Hindi

Address: 5-231/1, Chandra Nagar, Chintal, Hyderabad, 500054

DECLARATION

I hereby declare that all the above information given by me is true to the best of my knowledge.
